EDUCATION

University of North Texas Jan 2024 – Dec 2025
Master of Science in Advanced Data Analytics with concentration in Applied Artificial Intelligence GPA: 4.00

Shaheed Zulfiqar Ali Bhutto Institute of Science and Technology Sep 2018 – Aug 2022
Bachelor of Science in Computer Science GPA: 3.52

WORK EXPERIENCE

University of North Texas Denton, Texas, USA
Teaching Assistant, Course: Discovery and Learning with Big Data & Deep Learning with Big Data Aug 2025 – Dec 2025

- Led weekly lab sessions for 120 students, improving average model-development accuracy by 18% through hands-on guidance with neural network optimization, PyTorch/TensorFlow workflows, and data-pipeline best practices.
- Advised 40 student teams on experimentation strategy: hyperparameter tuning and loss-curve diagnostics, resulting in a 25% increase in teams achieving state-of-the-art benchmark performance on course Kaggle-style competitions.
- Designed high-throughput data-processing pipelines and GPU-accelerated training templates that reduced student model training time by 30–45% and enabled faster experimentation with CNNs, RNNs, and transformer-based architectures.

University of North Texas Frisco, Texas, USA
Student Operations Analyst Jul 2024 – Aug 2025

- Streamlined student-operations workflows by automating data ingestion and reporting using Python (Pandas) and SQL, reducing manual processing time by 40% and improving decision latency for departmental stakeholders.
- Built interactive dashboards (Power BI / Tableau) to analyze enrollment trends, resource utilization, and student engagement metrics; insights informed semester planning and improved forecasting accuracy by 22.5%.
- Leveraged LLM-based tools to classify student support requests and cluster operational issues, enabling faster triage and contributing to a 30% reduction in average response time across administrative teams.
- Developed monitoring scripts and validation checks to ensure data integrity across SIS, CRM, and internal analytics systems, decreasing data inconsistencies by 35% and supporting downstream ML-ready datasets.

PinkDetect – Your Breast Health Ally Toronto, Ontario, Canada
Machine Learning Engineer Mar 2023 – Dec 2023

- Engineered core ML components for PinkDetect, an AI-powered breast-health assessment app that blends clinical risk factors, user-reported data, and predictive modeling to deliver personalized early-screening insights for women.
- Developed a hybrid risk-assessment pipeline combining the Gail Model with ML-based feature enrichment, improving individualized breast-cancer risk stratification accuracy by ~18% compared to baseline statistical scoring.
- Engineered GPT-based LLM modules to interpret user-reported symptoms and generate clinically aligned health insights; reduced ambiguous user inputs and boosted app engagement through personalized explanations.
- Led technical demos showcasing PinkDetect's ML-powered risk-assessment pipeline, directly supporting the team in securing \$1M in venture and institutional funding (Western Union, Roddenberry Foundation).

Enum Digital Dubai, United Arab Emirates
Data Analyst – Marketing Intelligence Nov 2022 – Mar 2023

- Built predictive segmentation and churn-propensity models using Python (scikit-learn) to analyze multi-channel customer behavior, improving targeting precision and driving a 22% lift in high-value campaign conversions.
- Performed experiment analysis (A/B testing, uplift modeling) on paid media campaigns, uncovering optimization levers that reduced CAC by 55% and increased ROAS across key markets in MENA.

Intel ® San Jose, California, USA
Product Management Intern Sep 2021 – Mar 2022

- Collaborated with engineering, UX, and architecture teams to define feature specs for next-gen compute and AI acceleration products, aligning roadmap priorities with customer requirements.
- Conducted TAM sizing, performance benchmarking and competitive analysis across CPU/GPU segments
- Developed product briefs, performance dashboards, and technical collateral explaining silicon architecture, AI workload optimizations, and product differentiation, improving stakeholder clarity and accelerating decision cycles.

ADDITIONAL SKILLS AND INDUSTRY AFFILIATION

Technology: Microsoft Suite for data management, research analytics, and web development, Python, SQL, Machine Learning, Deep Learning, Data Visualization, Statistical Analysis, Exploratory Data Analysis, Cloud Computing, Big Data.
